

Our Dedicated Team Is Here to Help

Our clinical team is available around the clock, 24 hours a day, 7 days a week, to help you with the admission process at our facility.

Once a Referral Phone Call Is Made, Our Clinical Team Will Provide:

- Immediate assessment
- Paperwork/documentation
- Copying or faxing
- Assistance with family and/or power of attorney
- Transportation arrangements
- Post-discharge follow-up

The goal of each staff is to streamline the process from admission to discharge.

THREE RIVERS BEHAVIORAL HEALTH

Dedicated to being a trusted psychiatric health treatment provider, offering Inpatient Mental Health Treatment for Adults and Geriatric Patients through our Adult Unit and Older Adult Unit, as well as Adult Intensive Outpatient Programs. These services are designed to provide trauma-informed, short-term care and treatment to individuals with psychiatric diagnoses. We aspire to be recognized as a leading psychiatric health company, differentiated by discovery, innovation, and patient- and family-centered care.

WHO WE ARE

Three Rivers Behavioral Health Inpatient Hospitalization is designed for adults and older adults who are experiencing acute psychiatric symptoms. The dedicated caring staff delivers trauma-informed patient and family-centered psychiatric care 24/7. Our psychiatric inpatient unit, including both the **Adult Unit and Older Adult Unit**, specializes in adult treatment that focuses on psychological and physical health needs.

We Offer Specialized Care for Individuals With Primary Diagnoses That Include:

- Anxiety
- Depression
- Psychosis
- Schizophrenia
- Traumatic Stress
- Sleep Disturbances

Unlike most traditional psychiatric mental health inpatient units, we specialize in providing treatment for individuals with a history of mental health diagnoses and a secondary diagnosis of dementia, Alzheimer's disease, traumatic brain injury, stroke, or other neuropsychiatric disorders.

Intensive Outpatient Program (IOP)

IOP is provided for adults ages 18 and older to bridge the gap between acute care and traditional outpatient therapy. The goals of our IOP are centered on evidence-based group therapy, mindfulness, psychoeducation, holistic interventions, and coping strategy stabilization.

Three Rivers Residential delivers 24/7 residential mental health treatment for adults ages 18 and older. The trauma-informed residential program provides short-term mental health treatment to individuals with psychiatric diagnoses that do not require inpatient hospitalization and are not yet ready for partial hospitalization. The emphasis of programming is centered on evidence-based group and individual therapy, family/significant other therapeutic interventions, psychoeducation, holistic interventions, and socialization integration, with the goal of healing the body and nervous system to improve emotional and psychological well-being.
